The Prime Minister's son, Alexander "Sacha" Johnson, is quitting the country's top business lobby to launch his own campaign to become Senator for Western Australia. Sacha Johnson resigned his seat at the peak of Malcolm Turnbull's 2016 leadership coup after he was recruited to join the Coalition but decided to continue campaigning as a Labor candidate and was narrowly defeated. "As a son of Australia I will not be complacent, I won't be silent and I won't be invisible," he told reporters in Melbourne on Monday as he announced his new federal campaign. "I'll be out there talking to people about our future," he said. "The change I'm going to make to Australia and to the Senate is going to be about getting back to principles that have led us for so long." His new campaign will be based in Perth and he will continue working as a lobbyist for a large firm of accountants, Yieldex. With Labor's Richard Marles resigning after losing at May's federal election, Senator Johnson will be the leading Labor candidate for the Senate in WA at the next federal election. The recent Newspoll shows more voters believe the seats he is defending — Pilbara and Roe — have been lost to b7e8fdf5c8

Reviews of Smart Timestamp -Kien- | April 19, 2016 Cute Timekeeping Tool I have used Smart Timestamp since I got my first Vista upgrade, because I use FileRoller to do the same thing, and FileRoller has always been slow and frustrating to use, despite many updates. I am always looking for a fast little tool and this one came out first, so I gave it a try. What impressed me was that you could schedule a task. I do not do this often, but I sometimes find myself needing to quickly change the dates of several files and folders by a certain date. This way I know that I always have time to do it. Easy! The other thing that I like is that you can select files and folders easily and without having to enter a specific pattern. I have been using FileRoller, and I know I could never do that! When you have found a good little timekeeper, it's always a bonus when the company keeps a good support team! -Carli- | January 16, 2016 Scheduling Time Changes I love this program. I just use it to change the dates on selected files or folders, and it works like a charm. Smart Timestamp has a real advantage over FileRoller: it doesn't require you to create date changes, it detects when files or folders are changed, and then it automatically re-schedules their changes so that the date changes at the same time. -Koen- | July 30, 2015 Scheduled Task This is a great program. My only gripe is that it does not work with Windows 7. All other programs work just fine. -Rafael- | August 10, 2015 Scheduling Task This is a nice easy to use tool that gives a great overview of the

What's New in the Smart Timestamp?

2. is a light weight computer program with the simplest user interface, which doesn't require any previous experience for using it. 3. It can change the creation and modification date and time of several files and folders at once, and simply by adjusting the date and time of a single or few items you'll update the dates and times of all the others in a quick, easy, and hassle-free way. It is easy to install and use. Smart Timestamp is built on a clean and organized interface, allowing the user to see all the files and folders he wants to modify. The interface itself is as simple as it gets, containing just a few options, but they are all quite intuitive and easy to use. Start by selecting your files and folders from the source location by holding the Ctrl key while pressing the right or left button of your mouse. Choose the actions you want to apply to each file and folder by double-clicking on the item that needs to be altered, and set the new date and time by just adjusting the desired field with your mouse. The program includes a small taskbar icon that can be displayed on your desktop, allowing you to customize and change the date and time of all your files, in a few clicks. - 2. Smart Timestamp is a lightweight computer application with a clean interface, allowing you to see all the files and folders you want to alter the date and time of them. 3. It is easy to install and use. - 2. Smart Timestamp allows you to change the date and time of several files and folders at once, simply by adjusting the date and time of a single or a few items. 3. Simply select the files and folders from your computer by holding the Ctrl key while pressing the right or left button of your mouse, and select the actions that you want to apply to each of them, set the new date and time of the files and folders by adjusting the desired field with your mouse. 4. Besides this option, you can also choose a custom folder, and include subdirectories in it by selecting the custom folder before you hit OK. 5. Smart Timestamp is easy to install and use. - 2. The application is built on a clean and organized interface, allowing the user to see all the files and
